*SOLAS/IMO and U.S. Coast Guard approved products.*
COAST TO COAST SERVICE

Distribution International has a network of strategically positioned locations to service U.S. and Canadian coastal regions. Product offerings include a wide selection of marine insulation, interior finish products, thermal insulation systems, structural fire protection, joiner panels, marine accessories, DI's Neptune® product line, and more. Additionally, our thermal and acoustic attenuation performance products meet SOLAS/IMO and U.S. Coast Guard standards.

Insulation

DI stocks thermal and acoustical products including hullboard and non-combustible fiberglass rolls, joiner products, and high-density sound barrier mats to maximize sound attenuation measures. Our offering of structural fire protection products accommodate applications where weight and space are critical. (A-60 approval on steel with a thickness as low as 18-millimeters) DI specialists will assist you in determining the best application solution for steel or aluminum construction.

Acoustical
- Acoustical Hullboard/Waffleboard
- Non-lead Sound Attenuation Mat
- Perforated Metal Sheets
- Acoustiwool Products
- Lead Sound Attenuation Barrier

Exhaust
- Removable Blankets
- Calcium Silicate Pipe Covering and Ells
- Insulation Finishes
- Insulation Facings

Thermal
- Fiberglass Hullboard
- Fiberglass Blanket
- Polyimide Foams
- Non-Halogen Elastomeric Foam
- Mineral Wool

Interior/Exterior Outfitting

For interior and exterior outfitting needs, we supply joiner panel and ceiling systems, furniture, doors, and more. DI provides systems with B-15 approvals in a 19-millimeter thickness (single panel) and 12-millimeter panels as part of a double wall system. We provide panels and installation trim in limited colors. Further laminate options are available by special order including a stainless steel finish for galley applications. Additionally, our panel systems meet IMO requirements up to an A-60 rating.

Joiner Systems
- Soft-Core
- Solid-Core

Outfitting
- Vinyl Clad Metal Sheets
- Ceiling Systems
- Marine Furniture
- Doors
- Aluminum Trim

Structural Fire Protection

We understand the importance of protecting your personnel and structure. Insulation for equipment, sensor protection, ambient heat load reduction, and fire prevention are critical for effective safeguarding. DI provides mineral wool, high temperature blanket, and microporous technology products for various application requirements. In addition to insulation, we can fulfill your accessory needs for marine fire stopping applications.

Firestopping
- Marine Firestop Sealants
- Collars
- Pathways

Installation Accessories

Our stock of marine insulation accessory products includes adhesives, caulks, foam sealants, hand tools, fasteners, pins, and other related materials to streamline your project. DI’s ability to combine delivery of accessory items along with a complete line of insulation products provides a constant, value-added service to our customers.

Accessories
- Pins, Washers, Clips
- Tapes
- Adhesives, Mastics, Coatings
- Claths
- Jobsite and PPE Protection
With a distribution network that includes 50 U.S. locations, plus a dozen more in Canada through our subsidiary, Crossroads C&I, we’ve got you covered wherever you operate. Each DI facility provides unparalleled local support for delivery, installation, custom fabrication, and consulting services. Many of our customers do business around the world and our team in the export division is always ready to negotiate and expedite international orders and shipments.
