SECTION 1 – IDENTIFICATION

Product Name: PITTCOTE® 404 COATING

Manufacturer/Supplier:
Pittsburgh Corning Corporation
800 Presque Isle Drive
Pittsburgh, PA 15239

Information Number: 724-327-6100
CHEMTREC: 800/424-9300

Generic Name: Acrylic latex mastic

Use: PITTCOTE® 404 coating is a highly flexible, acrylic latex coating used with FOAMGLAS® insulation where a superior weather barrier coating is required.

Chemical Family: Mixture

General Comments: General information and emergency information available 8:00 AM – 5:00 PM Monday through Friday.

CHEMTREC telephone number is to be used only in the event of chemical transportation emergencies involving a spill, leak, fire, exposure, or accident involving chemicals. All non-emergency questions should be directed to technical service.

SECTION 2 – HAZARD(S) IDENTIFICATION

HAZARD CLASSIFICATION: Potential Irritant

SIGNAL WORD: WARNING

HAZARD STATEMENT:
May cause mild skin irritation
Can cause mild eye irritation
Wear eye protection, protective clothing, and protective gloves.
Avoid breathing sprayed material mists! Use an approved dust or particulate air filter when in close proximity of spraying of coating!

HAZARDOUS POLYMERIZATION: Will Not Occur

ROUTES OF EXPOSURE: Inhalation, Skin, Eyes, and Ingestion.

IMMEDIATE EFFECTS:

INHALATION: May cause mild irritation to mucus membranes and respiratory tract in poorly ventilated areas.

SKIN CONTACT: Repeated or prolonged contact with emulsion may cause mild skin irritation.

EYE CONTACT: Direct contact with eyes may cause mild irritation

INGESTION: Due to nature of product ingestion is not likely. If ingested, see physician
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:

ACUTE: Inhalation – may cause respiratory, eye, or nose irritation tract in poorly ventilated areas.

CHRONIC: Inhalation – May cause mild irritation to mucus membranes and respiratory tract in poorly ventilated areas.

CARCINOGENICITY: There are no components in this product that are listed as a carcinogen by NTP, IARC, ACGIH or OSHA.

SECTION 4 – FIRST AID MEASURES

GENERAL ADVICE: Do not handle until all safety precautions have been read and understood. Obtain special instructions before use. If PITTCOTE® 404 coating comes into contact with skin or hair, wash coating from area immediately. If skin irritation occurs, apply non-irritating skin cream and see physician if irritation continues for more than 2 days.

INHALATION: Remove victim to fresh air. If irritation develops, get medical attention.

SKIN CONTACT: Wash skin with soap and water. If irritation develops, get medical attention.

EYE CONTACT: Remove contact lenses. Flush eyes with large amounts of water, preferably lukewarm water, for at least 15 minutes. Avoid rubbing eyes. Get medical attention.

INGESTION: Due to nature of product ingestion is not likely. If oral contact occurs, do not swallow. If swallowed, see physician immediately. Rinse mouth until free of contaminating material. Drink water 16 oz. of water to dilute swallowed material.

SECTION 5 – FIRE FIGHTING MEASURES

This material is 40% water and is not likely to cause or contribute to a fire while wet. When dry, PITTCOTE® 404 coating is fire retardant and is not likely to greatly contribute to a fire. If the material does burn, use normal fire-fighting methods, water and carbon dioxide to control fire.

SUITABLE EXTINGUISHING MEDIA: Water, Foam, Carbon Dioxide, or dry chemical.
EXPLOSION DATA:

SENSITIVITY TO MECHANICAL IMPACT: NA
SENSITIVITY TO STATIC DISCHARGE: NA

UNUSUAL FIRE AND EXPLOSION HAZARDS:

None

HAZARDOUS COMBUSTION PRODUCTS:

Combustion may produce carbon monoxide, carbon dioxide and small amounts of hydrogen chloride.

SPECIAL FIRE FIGHTING MEASURES:

Wear self-contained breathing apparatus and protective clothing.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

PRECAUTIONS FOR PERSONNEL:

Ventilate area if necessary. Wear proper protective clothing including gloves. Wear personal protective equipment. Refer to recommendations in section 8. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling and before eating or drinking.

ENVIRONMENTAL PRECAUTIONS:

Prevent material from entering sewers or waterways. Dike and cover spill with sand, earth, vermiculite or other non-combustible absorbent. Place material in water-resistant container.

PROCESS FOR CLEANING:

Clean up residual material before it dries with soap and water.

WASTE DISPOSAL METHOD:

Dispose of in accordance with local, state and federal regulations.

REGULATORY REQUIREMENTS:

Follow applicable OSHA regulations (29 CFR 1910.120).

SECTION 7 – HANDLING AND STORAGE

HANDLING:

Use rubber gloves and protective glasses to protect against prolonged skin exposure and splashing into eyes. Wear particulate matter mask when spraying or when in close proximity to spray area.

STORAGE:

Store above 32°F (0°C). Do not allow this material to freeze while in a liquid state. Freezing will damage the polymer emulsion and may make it unusable for its intended purpose. This material will begin to freeze at 31°F (-5.6°C). Do not store in steel drums for more than 3 years without examining the container for corrosion. Corrosion may cause a weakness in the steel container or a leak of the material through the container. If a leak is found, stop leak and transfer to a new container.

KEEP AWAY FROM CHILDREN
SECTION 8 – EXPOSURE RESTRICTIONS AND PERSONAL PROTECTION

EXPOSURE LIMITS

EXPOSURE GUIDELINES: Toxicity is of this material low, although there are no tests determining or quantifying the level of toxicity of this material. The conclusion of low toxicity is determined by studying the ingredients, their toxicity and amount used in this formula.

ENGINEERING CONTROLS: Local exhaust if needed.

PERSONAL PROTECTIVE EQUIPMENT:

EYE PROTECTION: Wear protective Chemical goggles or safety glasses

SKIN PROTECTION: Wear proper protective clothing and equipment including gloves.

RESPIRATORY PROTECTION: a particulate matter mask when spraying or when in close proximity to spray area.

ENVIRONMENTAL EXPOSURE CONTROL: Provide exhaust ventilation or other engineering controls while spraying, to keep the airborne concentrations of vapor or mists below the applicable workplace exposure limits indicated.

WORK/HYGIENIC PRACTICES: Avoid contact with eyes and skin. Wash thoroughly after handling and before eating or drinking.

SPECIAL PRECAUTIONS: Follow protective controls listed in the Exposure Guidelines above when handling these products.

SECTION 10 – STABILITY AND REACTIVITY

REACTIVITY: Stable

STABILITY: Stable at standard temperature and pressure.

POSSIBILITY OF HAZARDOUS REACTIONS: Hazardous polymerization will not occur.

CONDITIONS TO AVOID: Temperatures below 0°C (32°F) or above 100°C (212°F)

MATERIALS TO AVOID: None known

DECOMPOSITION PRODUCTS: Carbon monoxide, carbon dioxide and hydrochloric acid may be released or formed as this product burns and decomposes.

This product contains no material in sufficient quantity to qualify as a health hazard or toxicological hazard.
SECTION 12 – ECOLOGICAL INFORMATION

BIODEGRADATION: NA.
BIOACCUMULATION: NA
AQUATIC TOXICITY: NA

OTHER INFORMATION: This material does not constitute a negative ecological or environmental problem as a dry product. As a liquid, this material is a low toxicity contaminant to bodies of water with which it has contact. Allow empty containers to dry.

SECTION 13 – DISPOSAL CONSIDERATIONS

DISPOSAL METHOD: Liquid material may be mixed with absorbent medium such as cat litter or calcium carbonate or saw dust to congeal and dry emulsion before disposal. Dispose of waste material in accordance with all local, regional, national, provincial, territorial and international regulations. EPA Hazardous Waste Number: D001 (Ignitability).

SECTION 14 – TRANSPORT INFORMATION

SPECIAL SHIPPING INFORMATION: Latex paints are not considered a hazardous material and are not subject to a hazard classification for shipping or transportation.

DOT SHIPPING CLASS: Not Regulated
TDG Not Regulated
IATA Not Regulated
