3. PRODUCT DESCRIPTION
Touch 'n Seal All Seasons one-component, moisture curing polyurethane foam sealant is uniquely formulated to perform under difficult low temperature conditions where traditional polyurethane foam sealants fail to cure. All Seasons Gun Foam cures at temperatures as low as 20°F (-7°C) and as high as 120°F (49°C). All Seasons Gun Foam meets the insulating and air sealing requirements of professional commercial, industrial, agricultural and residential contractors who must work in extreme temperatures. Once cured, All Seasons Gun Foam is non-toxic, fire-retardant, non-shrinking and permanently fills and seals cracks and gaps.

Basic Use
Use Touch 'n Seal All Seasons Gun Foam when an application must be made during extreme low or high temperatures. All Seasons Gun Foam seals cracks and gaps up to 1-½ inch (38mm) wide, providing a permanent insulating and air sealing solution to most building component materials, including: wood, concrete, insulating foam boards, metal, plastics and sheetrock.

The Touch 'n Seal All Seasons Gun Foam protects against both vapor migration and energy robbing air infiltration, helps to improve indoor air quality and provides superior insulation performance.

Composition & Materials
Touch 'n Seal All Seasons Gun Foam is permanent and dries within minutes of application.

Sizes
Gun Foam – Item # 4004529812
24 ounce (680 gm)

Benefits
• Use in temperatures as low as 20°F (-7°C) and as high as 120°F (49°C)
• Provides a permanent seal against air, moisture and insect infiltration
• Permanent installation; does not shrink or settle as do many caulk type sealants
• Compatible with all fiber insulation systems including cellulose, fiberglass and rockwool
• Bonds to common building materials, including: wood, concrete, insulating foam boards, metal, plastics and sheetrock
• Expands to fill gaps up to 1-½” (38mm) wide reducing air exchanges
• Reduces energy loss by as much as 40%
• Reduces use of fossil fuels and improves air quality
• No Ozone Depleting Chemicals
• Helps to reduce Greenhouse Gas Emissions
• Closed cell structure
• Allows for down sized HVAC systems; uses less energy, fewer cycle times, more consistent “comfort level”, reduces equipment maintenance
• Outperforms fiberglass
• Fire retardant

Limitations
• Foam is combustible. Do not expose to temperatures above 250°F (121°C), open flames or sparks
• Not for exposure to ultraviolet light
• Chemicals must be 60°F (16°C) - 90°F (32°C) prior to dispensing
• Do not store in temperatures above 120°F (49°C)
• Always refer to local building code regulations
• Do not leave product exposed – cover with approved facings
• Flammable propellant. Read MSDS and do not use near high heat, sparks or open flame

4. TECHNICAL DATA
Applicable Standards
• ASTM E84 Surface Burning Characteristics
• ASTM C518 R-Value
• ATM C 1536 Yield
• ASTM D1622 Density

Approvals/Certifications/Listing
• ICC ES ESR-1926
• International Building Code
• International Residential Code
• BOCA National Building Code
• 1999 Standard Building Code
• ICC-Evaluation Services

Physical/Chemical Properties
See Table. Test data available upon request.

Shelf Life
12 months in unopened container when stored between 60°-90°F (16°-32°C), in a dry, well ventilated area.

Storage & Disposal
Keep containers tightly closed in a cool, well ventilated area. Ideal storage temperature is 60°-90°F (16°-32°C). Storage above 90°F (32°C) will reduce shelf life. Do not store at temperatures above 120°F (49°C).

Avoid Freezing. Do not expose containers to conditions that may damage, puncture, or burst the
5. INSTALLATION/APPLICATION
Always refer to local building codes prior to application of Touch 'n Seal foam.

The Touch 'n Seal All Seasons Gun Foam can be applied to and will adhere to almost any traditional construction surfaces, including: wood, concrete, polystyrene, gypsum board, fiberboard, masonry and metal. Surfaces to receive Touch 'n Seal All Seasons Gun Foam must be dry, clean and free of dust, dirt, grease and other substances that may inhibit proper adhesion. Fill application area about 1/3 full, leaving room for foam to expand.

For best results apply Touch 'n Seal All Seasons Gun Foam when surface and ambient temperatures are between 60°F - 90°F (16°C - 32°C). Touch 'n Seal All Seasons Gun Foam may be applied to ambient and surface temperatures as low as 20°F (-7°C) and as high as 120°F (49°C). Chemical contents must be between 60°F - 90°F (16°C - 32°C) before dispensing.

6. AVAILABILITY & COST
Availability
Touch 'n Seal polyurethane foams are available throughout the U.S., Canada, Mexico and the world. Contact Convenience Products Customer Service at 800-325-6180 or FAX 636-349-1708 for distributor information.

Cost
Contact Convenience Products for local distributors who can provide cost and delivery information.

7. WARRANTY
Convenience Products warrants All Seasons Gun Foam to be free of defects in workmanship and function.

Convenience Products is not liable for any incidental, consequential or any other damages or remedies. There are no Warranties that extend beyond the description herein, however, certain states have specific laws regarding limitation on incidental or consequential damages, in which case, and you may have other legal rights.

8. MAINTENANCE
None.

9. TECHNICAL SERVICES
Technical assistance, including more detailed information, product literature, test results, assistance with preparing project specifications and application training is available by contacting Convenience Products Customer Service.

10. FILING SYSTEMS
Additional information is available from the manufacturer upon request.

The information contained herein was accurate at the time of publishing. Please refer to the Touch 'N Seal website for the latest information.
