

**DESCRIPTION**

Combination “S & J” Clips are manufactured from T-304 and T316 prime grade mill finish stainless steel. Dimensions are .020” x 3” x 3/4” with a pre-drilled 3/16” hole. The clips are compatible with strapping widths up to 1 1/4”.

**USES**

Combination “S & J” Clips are used to hold strapping in place on metal jacketing prior to final securement. In addition, they are used as risers to keep metal jacketing from slipping before strapping and seals, or sheet metal screws are used for final securement. The clips are not recommended to support the weight of deep corrugated sheets.

**ADVANTAGES**

- Pre-fabricated for lower installation and inventory costs.
- Rounded safety edges help prevent cuts and abrasions.
- Shorter leading end which lays flat for safety.
- Pre-punched holes increase production rates.
- Unique design keeps strapping in place preventing slippage.
