Perlite Pipe & Block Insulation

Publication No. IIG-200

Description

A molded, high-temperature, abuse-resistant pipe and block insulation composed of hydrous calcium silicate. Recommended for use in the industrial processing and power generation industries where pipe and equipment operate up to 1200°F (650°C).

Operating Temperature Limit: 1200°F (650°C)

Made of inorganic fibers derived from basalt, a volcanic rock, bonded with a thermosetting resin. Excellent performance in high-temperature thermal control and fire resistance applications for mechanical/power and process piping systems.

Operating Temperature Limit: 1200°F (650°C)

Made of inorganic fibers derived from basalt, a volcanic rock, bonded with a thermosetting resin. They can be directly installed on heated flat or curved surfaces in a variety of power and process piping applications.

Operating Temperature Limit: 1200°F (650°C)

Features a Xonotlite crystal structure that results in exceptional strength and extremely low water of hydration. Applications include curved vessels and large diameter pipes, fireproofing of structural steel, and as refractory backer in furnaces, boilers and kilns.

Operating Temperature Limit: 1700°F (927°C)

A molded, high-temperature pipe and block insulation with exceptional corrosion-inhibiting properties. For use on systems operating up to 1200°F(650°C), it is recommended for industrial processing and power generating facility applications using stainless steel piping.

Operating Temperature Limit: 1200°F (650°C)

Available Shapes & Sizes

*Form
Pipe Insulation
Quad Segments
Hex Pipe Covering (Ruston Plant Only)
Scored Block [12" (305 mm) wide] & [18" (457 mm) wide (Mesa Plant Only)]
Flat Block [6", 12" and 16" wide & (152 mm, 305 mm & 457 mm wide)]

*All pipe and block insulations are 36" (914 mm) in length.
**Available in ½" (13 mm) increments.

Pipe Sizes		**Thickness	
in.	mm	in.	mm
½ - 7	15 - 75	1	25
½ - 30	15 - 750	1½	38
½ - 44	15 - 1100	2 - 4	51 - 102
½ - 42	15 - 1050	4½ - 5	114 - 127

Thickness		Sheet Size	
in.	mm	in.	mm
1-5	25-127	24x48	610x1219

*Available in ½" (13 mm) increments.

Thickness		Sheet Size	
in.	mm	in.	mm
½-3	25-76	12x36	350x914

*Form
Pipe Insulation
Quad Segments
V-Grooved Block [12" (305 mm) wide]
Flat Block [6" (152 mm) wide]
Flat Block [12" (305 mm) wide]

* All pipe and block insulations are 36" (914 mm) in length.

Thermal Performance

	Pipe Sizes		**Thickness

Super Firetemp® High-Temperature Insulation

Publication No. IIG-103

Super Firetemp boards are a series of noncombustible, fireproofing products used in assemblies requiring one- to four-hour fire ratings with operating temperature limits from 1200 – 1800°F (649 – 982°C). Available in densities from 18-55 pcf (288-881 kg/m³), Super Firetemp is composed of hydrous calcium silicate and features a Xonotlite. Crystal structure, resulting in exceptional strength and stability under fire conditions. Recommended for use on columns, beams, tanks, air and exhaust ducts and cable trays.

Thickness		Sheet Size	
in.	mm	ft	m
1½-3	13-76	4x8	1.22x2.44

Insulkote® ET Weather-Protective Coating

Publication No. IIG-10

Developed as a high quality protective coating, Insulkote ET is a compound of selected and processed bitumens, non-asbestos fibers and mineral fillers.

Recommended for weather-protecting insulated vessels, tanks, piping, equipment, and duct work, Insulkote ET is a non-vapor barrier, weather-proof coating for use over thermal insulation where “breathing” is required.

CalBond® Gold High-Temperature Glue

Publication No. IIG-11

CalBond Gold is a modified, silicate-based glue for thermal insulations. It sets quickly to provide a high-temperature bond for porous insulating materials. CalBond Gold is completely asbestos free.

CalBond Gold is useful for bonding sections of calcium silicate or perlite high-temperature pipe or block insulation, to make mitered elbows, large insulating sections or other special shapes.

CalCoat-127® 1200°F (650°C) One Coat Finishing Cement

Publication No. IIG-12

CalCoat-127 is a proprietary blend of hydraulic cement, calcium silicate and inorganic mineral fibers, with corrosion inhibitors, that provides a smooth finish over high-temperature insulation.

CalCoat-127 is recommended for finishing use with calcium silicate or perlite insulation in high temperature piping and equipment applications.

Industrial Insulation Group, LLC is a Johns Manville company. IIG manufactures MinWool-1200® mineral fiber pipe, block and a variety of other insulations; Thermo-12® Gold Calcium Silicate pipe and block insulation; Super Firetemp® fireproofing board; SprouleWR-1200® Perlite pipe and block insulation; high temperature adhesives, and insulating finishing cement.
