Metal dacketing Specialists

## RPR Products, Inc.

Cut and Clip Bands are a pre-assembled ready to use product.
Cut to various sizes (see chart) our product offers a cost, time and labor saving alternative to field cutting and assembling from bulk packaging. Cut and Clip bands offer less scrap and material left on the job site.

Assembled from edge conditioned banding, the band is folded onto itself, a wing seal added, then mechanically attached onto itself with a strong interlocking clinch joint. This process locks the wing seal in place and produces a flatter assembled product. The trailing edge of band is mechanically trimmed allowing for safety and ease of assembly.

Cut and clip bands are available in $1 / 2^{\prime \prime}$ and $3 / 4^{\prime \prime}$ wide Stainless Steel T304, T316 and T304 painted material. Pre-packaged 50 to a bundle in a polyethylene bag (lengths up to $48^{\prime \prime}$ ) or cable tied together (lengths longer than 48"). Bags are labeled with type, size \#, and strength. This allows for ease of inventory, identifying and dispensing on the job site.

RPR Products Inc. Cut \& Clip Banding are designed and manufactured to comply with ASTM recommended standard.
