

Rmax Polyiso Roofing Insulation Fastening Guide

The following represent minimum fastening patterns for FM 1-90 windstorm ratings. Refer to individual product data sheets and “General Notes for Use of Rmax Roofing Insulations in Low Slope Applications” for suitable roof cover attachment methods. Consult roof cover manufacturer, as well as, Factory Mutual Approval Guide, RoofNav and Loss Prevention Data Sheets for additional requirements, e.g., approved fasteners and plates, higher uplift ratings, enhanced securement recommendations at perimeters and corners, etc.
