

Spray Rite Spray Adhesive is a fast tacking aerosol adhesive spray. It can be used to bond urethane foams, foam rubber, leather, paper, cardboard, cloth, masonry and certain plastics. It is excellent for tacking polyethylene sheets in asbestos abatement projects. It has been formulated to be ozone friendly by eliminating all chlorinated solvents and freons. Listed below are general physical properties and testing data.

<b>Size</b>	8 oz. net wt. – (226 grams)
<b>Pressure</b>	80 psig
<b>Heat Resistance (SAFT Test)</b>	150° F @ 1 pound per square inch Using ASTM D4498-85
<b>180o Peel @ RT</b>	7.2 pounds per lineal inch
<b>90° Peel @ RT</b>	6.3 pounds per lineal inch
<b>Contains</b>	Acetone (CAS #67-64-1), Propane (CAS #74-98-6, Hexane (CAS #110-54-3, Isobutane (CAS #75-28-5)

**For industrial use on:**

- Metal
- Wood
- Paper
- Vinyl
- Rubber
- Foam
- Glass
- Fabrics
- Carpet
- Fiberglass

**Features:**

- High-strength
- High solids
- Water resistant
- Low odor
